PROFESSIONAL SUMMARY

Java Backend Engineer with 3+ years of experience at Oracle building Java/Spring Boot REST APIs and Oracle DB/PL/SQL services for enterprise banking applications and Oracle Banking Payments (OBPM). Experienced in payment workflows, production support, and API automation, reducing validation cycles from 4 hours to 4 minutes.

EXPERIENCE

Software Engineer Jun 2023 - Present
Oracle - Java, Spring Boot, REST APIs, Oracle DB, PL/SQL *Pune, India*

- Designed and delivered **Java/Spring Boot REST APIs and backend services** for enterprise banking applications on Oracle FLEXCUBE, supporting Loans, CASA, Term Deposits, Locker, NBFC, and transaction workflows.
- Translated banking requirements into scalable service-layer logic and Oracle DB/PL/SQL procedures for Oracle FLEXCUBE implementation and enhancement activities.
- Integrated **Oracle FLEXCUBE with Oracle Banking Payments (OBPM)** for **NEFT, RTGS, IMPS, and payment-processing workflows**, covering transaction validation, initiation, status inquiry, error handling, reference tracking, and duplicate prevention.
- Developed **controlled payment APIs** for force-debit fund transfers, multi-debit/multi-credit transactions, and cheque-clearing pass/reject workflows using Java/REST and Oracle PL/SQL, strengthening validation controls, auditability, routing, and duplicate-instruction prevention.
- Strengthened outbound payment processing through branch-aware routing, unique-reference generation, payment/currency mapping, audit controls, and duplicate-instruction prevention.
- Built **end-to-end loan disbursement and repayment workflows** using service-layer logic and Oracle DB/PL/SQL procedures, covering validations, limits, transaction processing, and status handling.
- Resolved third-party integration and production issues through root-cause analysis of Java logs, API payloads, Oracle DB errors, and PL/SQL logic; built an AI-assisted log-analysis workflow that reduced debugging time by **30%**.
- Developed an internal API validation and developer-productivity tool for **150+ Oracle FLEXCUBE APIs**, cutting validation cycles from **4 hours to 4 minutes** (**60x faster**).

Backend Developer Intern Dec 2021 – Feb 2022
Walchand College of Engineering – React, Node.js, MongoDB *Sangli, India*

- Built a web-based maintenance management system using React, Node.js, and MongoDB, digitizing paper-based complaint workflows and improving tracking for users and administrators.
- Reduced complaint-resolution turnaround from **4 days to 1 day** by streamlining request submission, status tracking, and maintenance workflow management.

SKILLS

Languages	Java, JavaScript, Python
Backend	Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Microservices, Hibernate/JPA
Frontend	React, Oracle JET, HTML, CSS
Databases	Oracle DB, SQL, PL/SQL, MySQL, MongoDB, Query Optimization, Indexing
Tools & Testing	Git, Maven, Jenkins, Docker, OpenShift, Swagger/OpenAPI, Linux, Selenium, Postman
Domain	Banking/FinTech, Oracle FLEXCUBE, Oracle Banking Payments (OBPM), NEFT, RTGS, IMPS, Loans, CASA, Term Deposits, API Integrations
AI & ML	Generative AI, LLM Integration, Retrieval-Augmented Generation (RAG), Semantic Embeddings, Ollama, Machine Learning Fundamentals

EDUCATION

B.Tech in Computer Science and Engineering, Walchand College of Engineering, Sangli 2019 – 2023
CGPA: **8.20**

PROJECTS

Payment Operations Investigator | **Java, Spring Boot, React, Python, Ollama**

- Built a payment investigation workbench integrating **read-only FLEXCUBE inquiry APIs**, Excel and JSON imports to consolidate transaction records and preserve versioned investigation evidence.
- Implemented **Retrieval-Augmented Generation (RAG)** using local Ollama models, semantic embeddings and **90 versioned knowledge documents**, generating cited answers linked to selected payment evidence.
- Engineered **tenant-scoped role-based access, idempotent workflows, audit trails and case lifecycle controls**, with independent reviewer conclusions and downloadable PDF investigation reports.

AutoPay Guard | **Java, Spring Boot, PostgreSQL, Next.js, Keycloak**

- Built a recurring-payment tracking platform with **deterministic scheduling, spend projections, optimistic locking and idempotent APIs** to handle concurrent updates and duplicate requests.
- Implemented **OAuth2/OIDC authentication, JWT validation, role-based access control and workspace-level data isolation**, integrating a Next.js backend-for-frontend that keeps authentication tokens server-side.
- Engineered **transactional-outbox notification processing** with worker leases, bounded retries and failure recovery; validated backend workflows through **347 passing automated tests** and integrated **GitHub Actions CI, CodeQL and dependency scanning**.

HireME – ML Resume Screening Platform | **Python, Flask, Machine Learning**

- Developed a **Python/Flask recruitment web application** to support student recruitment and help recruiters identify suitable candidates based on company-specific hiring requirements.
- Built **machine learning models** to verify resume sections and automate candidate shortlisting, reducing manual screening time by **70%**.

ACHIEVEMENTS

- Received the **Oracle FSGIU Pacesetter – Spark Award** for customer outcomes, delivery excellence, innovation, and team success.
- Solved **1,000+ programming problems** across LeetCode and CodeChef **(3-star, maximum rating 1671)**.
- Developed **Moodle LMS 4.1+** for Walchand COE during an internship. (Website)
- Recognized at the **National-level Sixth Research Symposium on Computing (RSC)** for developing an Art Gallery Management System.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Oracle Data Platform 2025 Certified Foundations Associate
- Oracle Cloud Infrastructure 2024 Certified Architect Associate
- Oracle Cloud Infrastructure 2023 Certified Foundations Associate
